

IN THE CLAIMS:

Please cancel Claims 1 to 28 without prejudice to or disclaimer of the subject matter recited therein, and add new Claims 29 to 48, to read as follows.

Claims 1 to 28 (Cancelled).

--29. (New) An image capture apparatus comprising:

an image capture unit that captures image data; and

a control unit that controls a frame rate and a compression ratio of the image data,

wherein the control unit controls a frame rate and a compression ratio of the image data according to a frame rate and a compression ratio selected by a user.

30. (New) An apparatus according to claim 29, further comprising a display unit that displays information indicating the frame rate and the compression ratio selected by the user.

31. (New) An apparatus according to claim 29, further comprising a recording unit that records the image data.

32. (New) An apparatus according to claim 29, further comprising a wireless transmitting unit that transmits the image data by wireless transmission.

33. (New) An apparatus according to claim 29, further comprising a display unit that displays information indicating the frame rate and the compression ratio selected by the user, a recording unit that records the image data, and a wireless transmitting unit that transmits the image data by wireless transmission.

34. (New) An image capture apparatus comprising:
an image capture unit that captures image data; and
a control unit that controls the number of pixels and a compression ratio of the image data,

wherein the control unit controls the number of pixels and the compression ratio of the image data according to the number of pixels and a compression ratio selected by the user.

35. (New) An apparatus according to claim 34, further comprising a display unit that displays information indicating the number of pixels and the compression ratio selected by the user.

36. (New) An apparatus according to claim 34, further comprising a recording unit that records the image data.

37. (New) An apparatus according to claim 34, further comprising a wireless transmitting unit that transmits the image data by wireless transmission.

38. (New) An apparatus according to claim 34, further comprising a display unit that displays information indicating the number of pixels and the compression ratio selected by the user, a recording unit that records the image data, and a wireless transmitting unit that transmits the image data by wireless transmission.

39. (New) An image capture apparatus comprising:
an image capture unit that captures image data; and
a control unit that controls a frame rate and the number of pixels of the image data,
wherein the control unit controls the frame rate and the number of pixels of the image data according to a frame rate and the number of pixels selected by a user.

40. (New) An apparatus according to claim 39, further comprising a display unit that displays information indicating the frame rate and the number of pixels selected by the user.

41. (New) An apparatus according to claim 39, further comprising a recording unit that records the image data.

42. (New) An apparatus according to claim 39, further comprising a wireless transmitting unit that transmits the image data by wireless transmission.

43. (New) An apparatus according to claim 39, further comprising a display unit that displays information indicating the frame rate and the number of pixels selected by the user, a recording unit that records the image data, and a wireless transmitting unit that transmits the image data by wireless transmission.

44. (New) An image capture apparatus comprising:
an image capture unit that captures image data; and
a control unit that controls a frame rate, the number of pixels, and a compression ratio of the image data,
wherein the control unit controls the frame rate, the number of pixels, and the compression ratio of the image data according to a frame rate, the number of pixels, and a compression ratio selected by a user.

45. (New) An apparatus according to claim 44, further comprising a display unit that displays information indicating the frame rate, the number of pixels, and the compression ratio selected by the user.

46. (New) An apparatus according to claim 44, further comprising a recording unit that records the image data.

47. (New) An apparatus according to claim 44, further comprising a wireless transmitting unit that transmits the image data by wireless transmission.

48. (New) An apparatus according to claim 44, further comprising a display unit that displays information indicating the frame rate, the number of pixels, and the compression ratio selected by the user, a recording unit that records the image data, and a wireless transmitting unit that transmits the image data by wireless transmission.--
